### ENVIRONMENTAL DATA SHEET

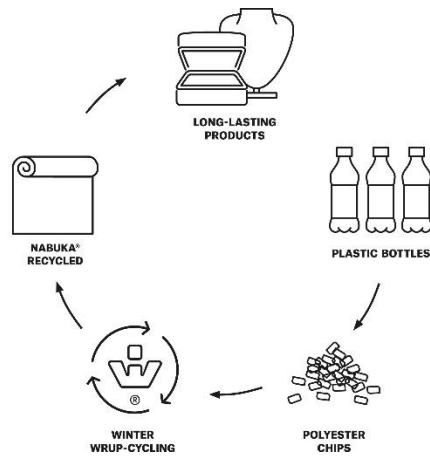

#### PRODUCT COMPOSITION

#### WINTER WRUP-CYCLING

WINTER WRUP-CYCLING revives recycled materials into high-quality coverings.  
 The recycling of plastic wastes into a new long-lasting product is an enormous contribution to help to reduce energy and disposal of highly continuous waste to landfill and marine world.

For the production of NABUKA® RECYCLED, we collect and reuse plastic bottles into a high-quality nubuck imitation leather. This way, we create a new sustainable material adapted for long lasting and high-quality applications.

#### POST CONSUMER WASTE

In our modern society, we produce and consume large quantities of plastic bottles. This generates an enormous quantity of waste, which is also called Post-Consumer Waste (PCW). The PET plastic bottles waste is used for the production of the upcycled product NABUKA® RECYCLED.

Through this process, we avoid the need of newly resourced polyester yarns and large quantities of plastic.

### WINTER & COMPANY
